

INSTALLATION GUIDE

Align the ▲ on the camera device to the ▲ on the delta trap.

Attach the device inside the delta trap by inserting it into the two holes.

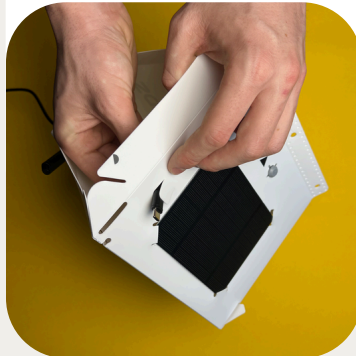

Insert the adhesive sheet (not included) into the delta trap.

Fold and attach the delta trap's front edges marked with the large bug icon.

Insert the solar panel's cable into the cable hole

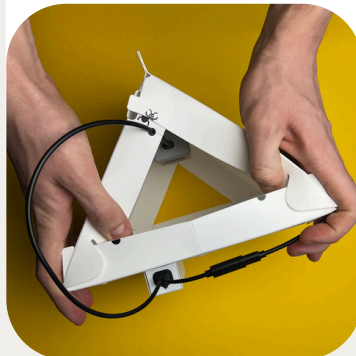

Connect the solar panel's cable with the shorter cable coming out from the battery.

Plug the other cable into the device. Firmly push them in to make a proper connection.

Fold and attach the delta trap's back edges.

Attach the hanger and hang the delta trap.

Don't forget to complete the activation flow in the APP to activate your trap

DELTA TRAP CARE INSTRUCTIONS

Check out these handy tips to get the best results from your traps!

Make sure to handle lures carefully to avoid scraping off insects, as this can disrupt daily counts and affect sticky sheet use.

The sticky sheet should not exceed 20x20 cm, and please lay it as flat as possible for the best photo quality.

Position the trap in a well-lit area, avoiding shadows or branches.

Keep the trap away from direct contact with pesticides to keep the lens clean.

Clean the solar panel with wet wipes when changing the sticky sheet.

Avoid touching the camera lens unless necessary.
